

FOR IMMEDIATE RELEASE

Momentum Healthware Announces Momentum Care Touch

Leading developer of healthcare software for the long-term care market previews touch-screen module for EHR charting at NADONA.

Brentwood, TN, June 8, 2006 –

Momentum Healthware (<http://www.momentumhealthware.com>), a leading developer of healthcare management software solutions for the long-term care market, announces today its planned release of Momentum Care Touch, a new touch-screen module for the capture of ADLs and other assessments performed by care delivery staff. Momentum Care Touch enhances the rich functionality within Momentum's Care Management series, and is available with versions 8.5 and beyond.

"Momentum Care Touch enables nursing aides and care delivery staff to quickly and easily capture assessments and seamlessly transfers data from the bedside to EHR, MDS and billing," says Charles LaFleche, Chief Executive Officer of Momentum Healthware. "Our new touch-screen module deepens the functionality of our clinical solutions, and meets market need for a comprehensive, intuitive, and fully-integrated solution."

Momentum Care Touch, with its real-time data flow into the Care Management series, provides nursing staff with instant information access, ensures accurate reimbursements, streamlines survey preparation, and dramatically reduces charting time. With the integration of Care Touch into Momentum's deep electronic health record and MDS functionality, Momentum's Care Management clearly provides the most complete and powerful solution for skilled nursing facilities.

Momentum Care Touch will be previewed in booth number 214 at the NADONA (National Association Directors of Nursing Administration) exposition in St. Louis on June 11-13th. Momentum Care Touch and Care Management version 8.5 will release for general availability fourth quarter of calendar 2006.
