Momentum Healthware Solution
for Assisted and Independent Living

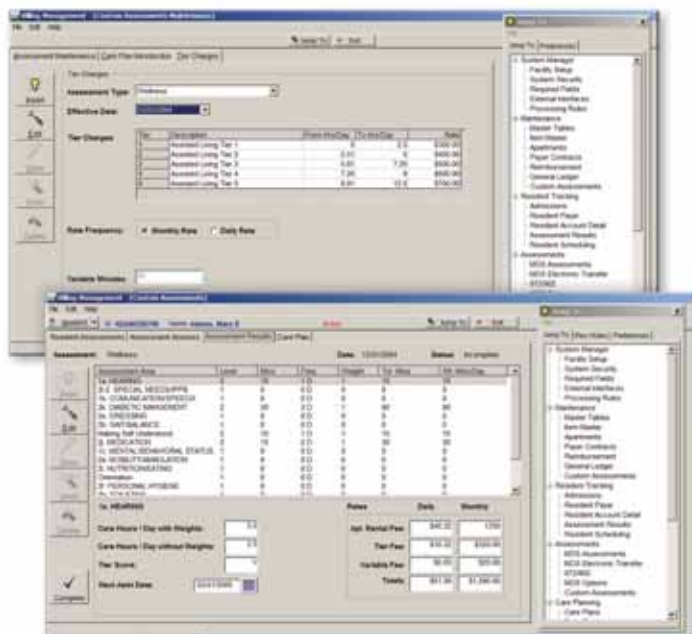

Solutions to optimize the management of Assisted Living, Independent Living and

Momentum Healthware solutions for independent and assisted living allow you to optimize care and billing according to the way your residents live. Deliver a single invoice for companion residents, track resident care history throughout their entire stay, transfer residents between facilities, manage cash flow, and produce reports. Momentum Healthware solutions for independent and assisted living offer comprehensive care management and billing solutions that integrate across the entire continuum of care – from independent living, to assisted living, to skilled nursing.

FLEXIBLE CARE MANAGEMENT

Momentum Care Management for assisted and independent living offers custom care and wellness plan creation and a seamless integration of care assessments with billing. The system allows setup of custom assessments on a time or point based system, with or without weights, and automatically accounts for custom assessments in the billing process.

ADAPTABLE BILLING MANAGEMENT

Momentum Healthware Billing Management is the complete billing solution for assisted and independent living facilities. Easy to learn and adaptable to your processes, Billing Management automates the billing process and reduces billing errors and rejected claims.

KEY SYSTEM FEATURES

- Provides combined billing for spouses or companion residents.
- Allows apartment pricing and resident-specific rates, as well as custom tier scores and their associated rates.
- Easily transfers residents between facilities while maintaining the resident's past balances.
- Provides a definable rule set for ending automated billing processes in the event of a resident discharge.
- Allows setting Quantity, Dollar Limits, Interest and Late Fees based on payer. Special payer coverage provides control over the billing process, special rules, such as Leave/Hold calculations, advance billing and pro-ration methods, and specific item assignment to determine coverage.
- Divides receipts between multiple residents.
- Provides comprehensive reports including: rent roll, physical days occupied, census variants, lease expiration, corporate occupancy, general ledger, cash and revenue journals, aging, Medicare rosters and logs, facility, payer and a resident account based suite of reports and much more. Plus, export any report to Excel or PDF format.
- Consolidates cash posting capabilities across multiple facilities.
- Generates all popular billing forms, including UB92, HCFA-1500 and private.

Care Communities

BUILT FOR THE WAY YOU DO BUSINESS

Momentum solutions are designed to improve your efficiency and cash flow while being flexible to the way you do business.

- Provides security rights by groups of users, or allows specific user permissions to each screen with Read-Only, Edit or Full Access privileges.
- Allows customization of system nomenclature (for example: rename a unit to apartment, or the ADT process to the status).
- Delivers seamless “one-click” navigation using the Jump-To menu.
- Provides a helpful dashboard of facility statistics, including: Resident & Unit counts, Occupancy, Previous Day Census by Payer, Current Admissions/Discharges/Transfers, Last Billing and Month End Cycle, Average Room Rate, Last Deposit Amount.

INTEGRATED FOR THE CONTINUUM OF CARE

Momentum Healthware solutions integrate seamlessly by sharing information with Momentum Clinical Systems, Dietary Management, Business Systems, and Decision Support Systems. Through the whole suite of Momentum Healthware solutions, we deliver everything needed to automate the continuum of care.

“You can’t go wrong with proven solutions from world-class software companies like Microsoft and Momentum. Based on our experience, these companies have a bright future in the long-term care industry.”

— Carol Raw,
CFO and Director of Operations
St. Francis Health Services

BENEFITS

Realize Integrated Care Assessments and Billing

As changes are made to a resident’s care assessment, they are automatically reflected in the billing system. This full integration between Care Assessment data and Billing ensures accurate invoicing.

Reduce Billing Cycles

Our flexible Billing Management solution allows you to bill across multiple facilities at the same time, reducing billing cycles.

Improve Cash Flow

You can view aging and revenue information and produce comprehensive reports to effectively improve and manage cash flow.

Improve Client Satisfaction

Providing one-invoice to spouses or companion residents reduces confusion and increases resident satisfaction.

MOMENTUM
HEALTHWARE

ated solutions

The most comprehensive Microsoft-based solution for long-term care

Thousands of facilities trust Momentum Healthware to provide the most comprehensive Microsoft-based solutions on the market. Our solutions integrate with other Momentum applications to serve the continuum of care.
