

Press Release

Momentum Healthware Attains Microsoft Gold Certified Partner Distinction

Winnipeg, MB, Canada, June 22nd, 2005 – Momentum Healthware Inc., a leading provider of software solutions for the healthcare industry, announced it has attained Microsoft Gold Certified Partner status with a competency in ISV/Software Solutions and Microsoft Business Solutions.

The Gold Certified Partner distinction was earned through Momentum's expertise in the healthcare marketplace and its proven record of developing innovative software solutions that are optimized for the Microsoft platform.

The Microsoft ISV/Software Solutions Competency recognizes the skill and focus partners bring to a particular solution set. Momentum has demonstrated a successful record of developing a comprehensive set of applications and services for acute and long-term care organizations based on Microsoft technologies.

Chuck LaFleche, President and CEO of Momentum Healthware said, "Our team serves customers with innovative solutions, and we're thrilled to be recognized by Microsoft for our leadership in the healthcare marketplace." Momentum achieved Microsoft Gold Certified Partner status by meeting specific criteria in a variety of categories, including; Microsoft Professional Certifications, Microsoft Competencies, Customer Satisfaction and Sales of Microsoft Software Licenses.

"Momentum is a good example of a Microsoft Business Solutions partner that is developing innovative solutions with Microsoft technology," said Garth Dean, Director, Microsoft Business Solutions. "By working with Gold Certified Partners like Momentum, Microsoft helps create solutions that address the needs of the healthcare industry and deliver exceptional value to customers."

Microsoft Competencies are designed to help customers differentiate a partner's capabilities with specific Microsoft technologies. The Gold Certified Partner distinction validates Momentum Healthware's ability to leverage Microsoft technologies in a practical, innovative manner that enables value-added solutions.

Momentum Healthware aligns Microsoft's technologies with its own product development strategies to meet its customers' needs. By utilizing Microsoft's core business components and tools, Momentum can focus on what it does best – delivering healthcare application functionality. As a Gold partner, Momentum Healthware will gain access to an even higher level of service and support from Microsoft, which will directly benefit their clients.

The Microsoft Partner Program was launched in December 2003 and represents Microsoft's ongoing commitment to the success of partners worldwide. The program offers a single, integrated partnering framework that recognizes partner expertise, rewards the total impact that partners have in the technology marketplace, and delivers more value to help partners' businesses be successful.

Founded in 1994, Momentum Healthware specializes in the development, delivery, integration and support of seamless information technology systems for the healthcare industry. Its solutions serve the provincial health requirements of rural hospitals and long-term care facilities in Canada, and the continuum of long-term care organizations in the United States. Momentum's industry compliant applications include: Electronic Health Record, Assessments, Registration, Clinical Portals, Dietary, Laboratory, Pharmacy, Radiology, Billing, Financials, Human Resources, and Decision Support Systems.

Momentum Healthware, Inc. is headquartered in Winnipeg, Manitoba, with United States operations headquartered in Nashville, TN.
