

MDS 3.0 Update

The transition to the MDS 3.0 tool from CMS represents a significant change for the Long Term Care community. Momentum's clients can be confident that Momentum is prepared and committed to your success during this transition. **MOMENTUM IS READY!**

MDS 3.0 is currently scheduled for implementation by October 1, 2010. With the majority of the CMS specifications and the RAI manual now published, Momentum continues with the development of our MDS 3.0 module. We are also organizing implementation, training, and support activities regarding the rollout of the MDS 3.0 module. If you are an existing Momentum client, you can rest assured that Momentum is fully committed to your successful transition to MDS 3.0.

We have already conducted several webinars for our clients to showcase the new MDS 3.0 module, and we are planning many more so be on the lookout for those dates. If you have not already attended a webinar, make sure to sign up when you receive the next notice.

Don't delay – Start planning your Questionnaire and CarePath modifications today. Momentum has affordable training and consulting packages available to assist. Contact the Momentum Support Center at 1-877-444-4149 or your Account Manager today for details.

If you are not yet a Momentum client and are not quite sure if your current technology will be sufficient to support your successful transition to MDS 3.0, then please contact Momentum and speak with one of our representatives. We are here to help.
