## Momentum Healthware, Inc. Releases MDS 3.0 to Beta Testing on Schedule

Winnipeg, Manitoba, July, 15, 2010 – Momentum Healthware, Inc. today released MDS 3.0 to beta testing on schedule. Momentum developed the MDS 3.0 software as a module within their Care Management electronic health record software suite. The general release of Care Management version 10.5 is scheduled for September in time for the October 1<sup>st</sup>, 2010 effective date of this new federally regulated and required assessment.

Momentum conducted over twenty MDS 3.0 Product Review sessions with existing clients in which they received over one hundred comments in regards to functionality and user interface. *“Momentum has always had our clients in mind during the design and planning of new modules and functionality for our electronic health record applications; and this release is no exception. The level of client involvement through this process has been tremendous, and the achieved outcome has been fantastic.”* said Adam Prybyl, Director of Product Management.
