

Momentum Healthware Client Profile

The Village Manages Resident Menus Efficiently

The Village at Manor Park has been using Momentum Dietary Management solution since 2000. At their skilled nursing facility, approximately 190 residents use select menus, which requires an innovative solution for day-to-day management.

SOLUTION

Momentum Dietary Management was implemented to manage select menus, as well as streamline production.

“Changing the master menu is easy. I like the ability to restrict menu items at the master menu screen. We have improved our resident surveys, have fewer family complaints about food, and can individualize selections,” says Jean Campbell, MS, RD, CD and Clinical Nutrition Manager.

The master menus consist of two five-week cycles, plus holidays and special functions. Menus are reviewed and adjustments are made to the master menu on a regular basis. All recipes are on the Momentum system and are printed as needed, as well as production sheets, nourishment labels, tray tickets and select menus.

“Since 2000 our production has become more accurate with fewer errors from cooks and food service staff. Cooks like the recipe layout with ingredients and directions together. We use the recipe conversion often, finding it accurate and easy,” says Campbell. “And food service associates like the specific production sheets.”

Village clinical staff utilize the calorie count screen and have used the diabetic exchange screen. They also print the Nutritional Care Plan to use during family and team meetings. Nurses have the ability to move eating assignments one meal at a time if needed.

“We have been very happy with the program and with the technical support. We are utilizing most of the functions of the program. Since implementing Momentum, we have reduced waste, improved resident satisfaction and decreased time spent on non-productive tasks, such as looking for a recipe.”

Solution Brief

Organization

The Village at Manor Park has been helping older adults since 1925. Today, it is a senior healthcare system that is based on Christian values.

Situation

The Village needed a solution to efficiently manage select menus for residents.

Solution

Momentum Dietary Management

Benefits

The Village has reduced waste, improved resident satisfaction, and decreased time spent on non-productive tasks.

Momentum Healthware

Trusted Provider for Long-Term Care Solutions

Thousands of facilities trust Momentum Healthware to provide the most comprehensive Microsoft-based solution for long-term care organizations. Momentum offers software solutions that fully-integrate the continuum of care – from independent living, to assisted living, to nursing homes.

Momentum solutions enable an improved quality of care, reimbursement accuracy, simplified reporting documentation, and substantial improvement in staff efficiency and overhead costs.
